

QUIETROLE

Reg. U. S. Pat. Off.

"The ORIGINAL
NON-INFLAMMABLE
NON-CONDUCTIVE
LUBRICANT CLEANER"

manufactured by

QUIETROLE COMPANY

Spartanburg, South Carolina

Miss Quietrole

Joe: "Gosh! You sure work fast and smooth."

Miss Quietrole: "Oh yeah! Well, you can depend on me to keep it quiet."

controls and switches **LIKE NEW** by the basketful for only a few **PENNIES** a **DAY**

That's what QUIETROLE can do for you, and only QUIETROLE will give that long lasting smooth, quiet operation . . . even new controls last longer and operate quieter when treated with QUIETROLE . . . the ORIGINAL and most RELIABLE product of its kind. . . .

THE CHOICE OF BETTER SERVICEMEN "EVERYWHERE"

More Servicemen for more years have used QUIETROLE in preference to any other product of its kind. QUIETROLE was created through years of research to fill the need of the Radio & TV Technician for a Lubricant & Cleaner to whip the problem of noisy controls and switches, without removing them from the chassis.

CREATED TO MEET A DEMAND, NOT A PRICE, it gave the Serviceman his first effective means of whipping the noisy control problem.

It is the ORIGINAL and STANDARD of the ELECTRONIC INDUSTRY and has proven its merit and superiority over all (would-be) imitations. When you buy QUIETROLE you are buying the product known WORLD WIDE for its quality and reliability. Why take less when a few pennies more will get you the best.
